Anthony A. Williams, Mayor

You May Be Eligible for an Energy Star Rebate!

If you purchased an Energy Star rated Refrigerator or Window Air Conditioner between April 13, 2006 and May 31, 2007, you can receive a \$100 Rebate on the refrigerator and a \$50 rebate on the window air conditioner. **Just fill out the detachable Mail-In Rebate form in this brochure and mail it with a copy of a dated appliance purchase sales receipt and your most recent electric bill to the DC Energy Office at the address listed on the Mail-In form.**

You must be a DC resident with an electric utility account to qualify. This rebate program is being operated by the DC Energy Office and funded by the Reliable Energy Trust Fund to encourage DC electric consumers to be energy efficient and lower their energy use. There is a rebate limit of one refrigerator and two room air conditioners per household.

Look for the Energy Star label, developed by the US Environmental Protection Agency to help businesses and individuals protect the environment through superior energy efficiency. Energy Star appliances can save as much as 40% on energy costs associated with them. With the help of the Energy Star program, Americans have saved \$12 billion on utility bills.

Select the Right Room Air Conditioner

Bigger isn't always cooler. That's especially true when you select a room air conditioner. Operating an air conditioner unit that is too large for a room wastes energy because it's less effective at removing humidity from the air. That's why it's important to select the right unit to fit your needs.

Room Size (sq. ft.)	Room Air Conditioner Size (BTUs per hour)
100 - 150	5,000
150 - 250	6,000
250 - 300	7,000
300 - 350	8,000
350 - 400	9,000
400 - 450	10,000
450 - 550	12,000
550 - 700	14,000
700 - 1,000	18,000

Typically the smallest room air conditioner available is 5000 BTU's per hour.
